Summary

Final-year Computer Science (AI/ML) undergraduate and Software Engineering Intern specializing in agentic AI, back-end development, and cloud engineering on Microsoft Azure. Building AI-assisted automation tools and API-connected agents using Azure AI Foundry, FastAPI, and Python. Microsoft Azure certified, with hands-on experience building document-processing pipelines, tool-calling agents, and secure, production-oriented cloud services.

Technical Skills

Languages: Python, Java, SQL

Agentic AI & Automation: Azure AI Foundry, Tool Calling, MCP Servers, API-Connected Agents, Prompt Engineering, OCR, Excel Automation

Backend Development: FastAPI, REST APIs, CRUD APIs, JWT Authentication, OAuth2, SQLAlchemy, Alembic

Cloud & DevOps: Microsoft Azure, Azure App Service, Azure Functions, Azure Storage, Microsoft Entra ID, Azure DevOps, GitHub Actions, Azure Application Insights, CI/CD

Databases & Tools: PostgreSQL, SQLite, Git, GitHub, VS Code, Sourcetree

Experience

Grant Thornton Bharat LLP

Feb 2026 – June 2026

Software Engineering Intern — Agentic AI, Backend & Cloud

BackCheck AI — AI-Assisted Background-Check Automation

Tech: Azure OpenAI (Tool Calling), FastAPI, Python, PyMuPDF, Playwright, Cosmos DB, Entra ID

- Engineered an asynchronous, AI-assisted background-check automation platform (FastAPI control plane with an Azure queue worker) that turns uploaded compliance and media report exports into structured adverse-risk summaries for due-diligence and client-onboarding workflows; adopted by 750+ users with ~1,000 requests/month since launch.
- Built the document-processing pipeline end to end: ingests ZIP archives of World-Check and Media Check PDF exports, extracts text and embedded links with PyMuPDF, and retrieves external sources through a resilient fallback chain (Playwright, Azure Document Intelligence OCR, BeautifulSoup, ScraperAPI) handling dynamic, protected, and PDF-based sources.
- Integrated schema-constrained Azure OpenAI tool calling for structured extraction and adverse-content analysis, classifying findings into a fixed 21-category risk taxonomy and auto-generating review-ready Excel workbooks; added change-aware incremental reprocessing that diffs re-submitted reports over stable source identities to re-analyze only new sources and flag additions and removals.

MarketBot — Multi-Agent Company-Research & Report Automation

Tech: Azure AI Foundry, FastAPI, Python, Azure AI Search, OpenAI Embeddings, Cosmos DB, Microsoft Fabric, python-docx

- Engineered an agentic market-research platform (FastAPI control plane with Azure Queue background workers) that orchestrates multiple Azure-hosted AI agents to generate branded, multi-section company-analysis reports from annual reports and enterprise data sources, with Server-Sent Events streaming for live progress and Cosmos DB job tracking.
- Built a retrieval-augmented ingestion pipeline that extracts annual-report PDFs via Azure Document Intelligence, chunks them into overlapping page windows, embeds them, and indexes 1,536-dimensional vectors in Azure AI Search; a parallel orchestrator then runs twelve report sections concurrently through named Azure AI agents, enforcing per-section source rules, JSON output contracts, retry policies, and recency filtering.
- Integrated multiple enterprise data sources — relationship intelligence (Introhive), ERP pipeline data, and a Microsoft Fabric warehouse accessed via ODBC service-principal authentication (CapIQ company/investor/board and meeting data) — merging and deduplicating them into a unified report payload, rendered into a branded Microsoft Word report (python-docx) with an embedded native chart and delivered via Blob Storage SAS URLs and Microsoft Graph email.

Education

B.Tech (Hons.) in Computer Science & Engineering — AI/ML Specialization

2022 – 2026

Manipal University Jaipur, Rajasthan, India

Certifications

Microsoft Certified: Azure AI Cloud Developer Associate (AI-200)

In Progress

Microsoft Certified: Azure Fundamentals (AZ-900)

Dec 2025

Microsoft: Artificial Intelligence on Microsoft Azure

Jul 2025

Oracle Academy: Database Programming with SQL

Dec 2023
